Staging server - Installing sudo

All commands should be ran from the staging server's VirtualBox VM unless noted otherwise.

Drop into root
```
su
```
<Enter in your password>

Install sudo
```
apt-get install sudo
```

^ Goto the VirtualBox's Devices -> Optical Drives menu and select the Debian ISO, then hit enter.

Add your user to the sudo group
```
adduser nick sudo
```
<Replace nick with your username when you provisioned Debian Jessie>

Edit the /etc/sudoers file
```
nano /etc/sudoers
```

[watch the video to see what you need to edit]

Logout of root and exit so you need to log back in
```
exit
exit
```

^ Yes, type it twice.

Log back in
<Enter your login and password>

Confirm who you are
```
whoami
```

Confirm you are root when you use sudo, and it should not require a password
```
sudo whoami
```
